

Take Your Teacher to Work Day

Ideas for follow-up activities to use with students/colleagues

-  Use your digital or video camera to record your experience. Create a power point presentation or slide show to share with your students/colleagues. This could be shown at a faculty meeting (be sure to condense your presentation to 5 minutes).
-  Invite your business host or company representative to speak in your classroom.
-  Bring back brochures, literature, samples, and other artifacts from the business to use for *Show and Tell* with your students.
-  Contact the Agency for Workforce Innovation (in advance) for materials to use with students. www.floridajobs.org
-  Conduct mock interviews that would be applicable to this industry/career. Work with the video/TV production department to allow students to review their interview skills.
-  Plan a field trip to enable your students to experience the business firsthand.
